EDUCATION

The University of Texas at Dallas, Richardson, TX — May 2028
Bachelor of Science, Computer Science — GPA 3.45
Minor in Business Intelligence & Analytics
Relevant Coursework: Data Structures & Algorithms, Linear Algebra, Computer Architecture, Database Systems

SKILLS

Languages: Python, TypeScript, C++, Java, SQL
Frontend Web & Mobile: React, Next.js, React Native, Tailwind CSS
Backend & Data: Node.js, FastAPI, MongoDB, PostgreSQL, Prisma, Rest APIs
Developer Tools: Git, Docker, Visual Studio Code, Postman

EXPERIENCE

Pfizer (via Extern Externship Program), Remote — May 2026 – August 2026
AI Extern

- Evaluated and benchmarked Optical Character Recognition (OCR) engines, specifically Tesseract and PaddleOCR, to optimize automated text extraction and data processing for complex supply chain documents.
- Architected a context-aware Retrieval-Augmented Generation (RAG) pipeline utilizing LlamaIndex to enhance document intelligence, semantic search, and retrieval accuracy.
- Engineered an end-to-end, AI-powered document intelligence system to process full pharmaceutical SDF documents, integrating text extraction, classification, and RAG retrieval while rigorously testing for accuracy, speed, and reliability.

Kids U (via UTDallasEPICS), Richardson, TX — August 2025 – December 2025
Full Stack Engineer & Mentor Communication Lead

- Built a secure full-stack authentication system for a donor and volunteer management platform, implementing 2-Factor Authentication (2FA), email verification, and password recovery workflows.
- Revamped the frontend dashboard and login interfaces, optimizing the user experience for administrative data management.
- Coordinated sprint-based project development to track weekly milestones and collaborated with stakeholders in weekly review meetings to present progress, refine requirements, and integrate feedback.

PROJECTS

GreenGain | Hack-Earth Hackathon Winner: Best Sustainability Impact Award — February 2026
A web app that turns IRS Form 5695 tax credit rules into a personalized, step-by-step home sustainability roadmap.

- Implemented the frontend application utilizing Next.js and React, constructing a scalable library of modular, reusable UI components styled with Tailwind CSS to deliver a highly responsive user experience.
- Constructed an interactive, state-driven tax credit estimator that algorithmically maps complex IRS Form 5695 logic, dynamically generating personalized roadmaps for sustainable home infrastructure upgrades.
- Rapidly prototyped a visual CO2 Impact Tracker under strict hackathon time constraints, delivering a functional dashboard that calculated and displayed the environmental impact of home infrastructure upgrades

Medguide| Node.js, Express.js, MongoDB, Python, React Native — August 2025 – December 2025
A mobile health app that lets users track personal health metrics and find nearby pharmacies in real time.

- Spearheaded end-to-end integration by connecting the frontend application to RESTful backend endpoints, managing asynchronous data fetching and state management to accurately display user health metrics.
- Developed dynamic survey routing logic and integrated the Google Maps API to launch a geolocation-based pharmacy finder, enabling real-time spatial data rendering for users.

ORGANIZATIONS

Women Mentoring Women in Engineering, Mentee — September 2024 – Current
AIMD, Member — September 2025 – December 2025
ACM, Member — September 2024 – December 2025
